FUAD RIFQI ZAMZAMI

Frontend Engineer | JavaScript & TypeScript | Vue.js & React

Jakarta, Indonesia | fuad.rifki98@gmail.com | +6282281400423

https://fuadrifki.pages.dev | https://github.com/fuadrifki | https://www.linkedin.com/in/fuad-rifki

Frontend Engineer building and maintaining web and mobile applications with JavaScript, TypeScript, Vue.js, React, and React Native. Experienced in complex logistics, enterprise, e-commerce, and mobile products, with strengths in frontend architecture, reusable component development, API integration, internationalization, PDF generation, thermal printing, and AI-assisted development workflows. Also experienced in selected backend development work using Node.js and NestJS. Comfortable translating business requirements into maintainable solutions and collaborating across Product, Backend, Platform Engineering, and QA teams.

CORE SKILLS

Programming Languages : JavaScript, TypeScript, HTML, CSS

Frontend Frameworks & Libraries : Vue.js, React, Next.js, Nuxt.js, React Native, Tailwind CSS

Mobile Platforms: Android, iOS

Backend & API Development : Node.js, NestJS, REST APIs, GraphQL, Frontend-Backend Integration

Architecture & UI Development : Clean Architecture, Component-Based Architecture, Reusable Components, State Management, Design Systems, Responsive UI Development

Application Capabilities : Internationalization (i18n), PDF Generation, Thermal Printing

AI Development Tools : OpenCode, Claude, Codex, Kiro

Testing : Jest, Playwright

Tools & Collaboration : Git, Jira, Figma, Vercel, Cloudflare

PROFESSIONAL EXPERIENCE

Senior Frontend Developer

Lion Parcel - Jakarta, Indonesia | May 2021 – Present

Contribute to the development and maintenance of multiple web applications, including Genesis, a large-scale logistics operations platform.

- **Genesis — Logistics Operations Platform:** Develop and maintain frontend features across end-to-end shipment workflows, from booking and shipment processing to tracking and delivery, as well as customer management and administrative operations.

- Develop reusable frontend components and implement internationalization, PDF generation for operational documents such as shipping labels and waybills, and thermal printing.
- Integrate frontend features with backend services through REST APIs and other service interfaces.
- **Lion CMS — Content Management System:** Contribute to frontend feature development and API integration.
- **Lion Parcel Website — Corporate Website:** Develop frontend features and help break down article and CMS tasks for other engineers.
- **Pintoko — E-commerce Platform:** Develop frontend features and API integrations across product management, checkout, and payment workflows.
- **Shopify × Lion Parcel:** Develop Shopify-side booking and address management features and connect them with Genesis.
- Collaborate with product teams, backend engineers, Platform Engineers, QA, and other stakeholders during requirement grooming and implementation to clarify business needs, align on technical approaches, and ensure features meet agreed requirements.
- Support frontend team delivery through task assignment, code reviews, code approvals, and progress monitoring, including coordinating work for approximately 6–7 engineers when needed.

Frontend Developer (Freelance)

Jersium - Poland | January 2025 – December 2025

E-commerce platform project focused on delivering a complete online shopping experience, from product discovery to customer account management.

- Developed the end-to-end frontend of an e-commerce platform using Next.js, covering the full user experience from initial page development to customer account management.
- Translated client requirements and designs into pixel-perfect, responsive user interfaces, ensuring visual accuracy and consistency across the application.

Mobile Frontend Developer (Freelance)

Tetra Pulsa — Indonesia | April 2022 – July 2023

Developed a mobile application for Android and iOS that enables users to convert mobile credit into cash.

- Developed mobile frontend features using React Native and TypeScript.
- Implemented features for checking real-time provider conversion rates, submitting credit conversion requests, and tracking bank-transfer payouts.

Frontend Developer

Refactory - Yogyakarta, Indonesia | October 2019 – April 2021

Contributed to client and internal projects across different business domains and technology stacks.

- **E-Procurement PT PINDAD (Persero) — Procurement Application:** Contributed to frontend development using React, TypeScript, and GraphQL. Project: https://eproc.pindad.com/
- **Refactory Company Profile — Corporate Website:** Contributed to website development using WordPress and Elementor.
- **Atenda — Attendance and Payroll Application:** Contributed to frontend development using React.
- **Ayo Belajar — Learning Platform:** Contributed to frontend feature development using React.
- **Universitas Terbuka — Academic Information System:** Contributed to system development using Laravel.
- **Lion Parcel — Genesis:** Contributed to logistics platform development using Vue 3, TypeScript, Clean Architecture, and REST API integration.

EDUCATION

Universitas Mercu Buana Yogyakarta

Bachelor's Degree in Informatics Engineering | March 2020 – May 2022

Politeknik Sawunggalih Aji

Diploma III in Informatics Engineering | September 2016 – August 2019
